

...the window system with softer lines

Style needn't mean compromise

Take a look at the stylish lines of the **VEKA Fully Sculptured Window System** and you will see PVC-U in a new light.

As technically advanced as it is beautiful, **Matrix FS** rewrites the rules, adding a softer, more rounded look to suit any home, whatever its size or vintage.

Its perfectly balanced curves and slender sightlines create a unique appearance that blends with the character of classical architecture but is equally at ease in the most contemporary of homes.

Matrix FS is the latest in a long heritage of **VEKA PVC-U** frame technology that has stood the test of time in some of the world's largest and most prestigious building projects as well as literally millions of private homes.

VEKA Matrix Fully Sculptured

...the window system with softer lines

The choice of specifiers

Matrix FS is widely chosen for its aesthetic appeal, with a soft, sculptured appearance. Demand for the Matrix FS system continues to grow in new build and commercial applications for projects requiring the look and feel of quality hardwood frames, without the maintenance.

The choice of fabricators

The Matrix FS system is technically exceptional and allows for simple fabrication and trouble-free installation.

The 70mm front-to-back dimension makes the system ideal for the tidy replacement of traditional, slimmer windows.

The choice of homeowners

Windows created from the Matrix FS System not only look superb, but also enhance a home's warmth, security and value. Requiring minimal maintenance, the FS System is also designed to include Secured by Design (SBD) features, enabling an enhanced security specification far higher than old-fashioned timber windows.

Its soft, rounded lines can offer a level of detailing that is sure to appeal to the discerning homeowner.

Style and functionality

Windows created from the stylish Matrix FS System are fitted with tough steel and alloy hardware components including, where appropriate, multipoint locking, hook-locks, shootbolts and other mechanisms which provide a formidable barrier against intruders.

The result of massive investment in development, tooling and extrusion technology means that the VEKA Matrix FS System can be used to create virtually any style of window or door, for any type of building including casements or tilt & turn.

Supplied with pre-inserted gaskets and available in a range of woodgrain effects and colours.

Open new doors

Advanced technology doesn't have to be left at the door. You can now have all the same good looks and security benefits of the VEKA Fully Sculptured system for doors too.

Whether it's the traditional front and back door, patio (tilt/sliding) or French (hinged) double doors, you can enjoy the looks, security and weather resistance to perfectly match your Fully Sculptured windows.

Versatility

The VEKA Fully Sculptured system can be used to create traditional casements, tilt & turn or french windows which are a popular option for a secure method of ventilation coupled with easy cleaning from the inside.

Window Style		Max Width	Max Height	Door Style		Max Width	Max Height
Casement Window Side Hung Sashes	Un-reinforced	700mm	1000mm	Residential Door	Fully reinforced	1075mm	2125mm
